

Login Page Instructions

The instructions that appear on the Moodle login page are stored in the Moodle configuration property `auth_instructions`. You can edit them from:

Site Administration > Plugins > Authentication > Manage Authentication (instructions)

In the database, look for `auth_instructions` in the `mdl_config` table and change the value (which can be HTML):

```
select * from mdl_config where name = 'auth_instructions'
```

You may need to purge your Moodle cache to see changes.
